

Overview

With the new Secabo TM1 heat press, mugs can be printed on using sublimation or other transfer technologies. The TM1 Secabo heat press is for beginners and professional users and suitable to use with their digital controller quickly and safely. The pressure can be easily adjusted by a hand wheel. The TM1 can optionally be equipped with 4 different heating elements – even in a cone-shaped design.

features

digital controller

Time and temperature are set within one digital controller.

Variable working pressure

the pressure can easily be adjusted - depending on the technology and object

Working Safely

The safety and quality of the machines is permanently controlled by German safety standards

Exchangeable heating sleeves

Exchangeable heating sleeves available - in several diameters, also conical.
